Yes, this drilling program initiated in November 2014 and is expected to be completed in a couple of more months. The harsh winter was a factor, but scheduled 'field activities' are from 7am to 5pm in an effort to get the work completed.

Navy is also moving ahead.
Rob

Thank you Rob. This is nice. The photos and text from your field visit provide a very informative description.

Are VP7 and VP11 for the hotspot that the Navy recently discovered in the OU-2 plume?

Subject: Drilling program field visit 3_12_2015 Northrop-Grumman/Navy Bethpage

Hello Carol

I was able to visit the Bethpage area and observe the ongoing drilling and monitoring well installation being conducted by the Northrop-Grumman consultants in Bethpage and have attached a memo regarding the site visit. I also talked with Mike Zobel from EnSafe and provide an update on the Navy drilling which I have previously visited. I've also attached a copy of the NYSDEC's Fact Sheet on the Northrop drilling program. It is regularly distributed and available at the sites.

Rob
